

Sustainability is about keeping the environments in which we live and work as clean, green, and healthy as we can for ourselves and for future generations. The strongest sustainable impact results when our actions benefit the environment, the economy, and society as a whole. These are known as the three pillars of sustainability!

Sustainable 19125 & 19134 is connecting neighbors to sustainability through green actions. Check out how your green actions positively impact your life, your pocketbook, and the environment!

Green Action	Sustainable Impact
 Walking, biking, or taking public transportation	 Gets more cars off the street, lowering carbon emissions, reducing air pollution, and saving you money on gas!
 Planting a tree	 Improves air quality, lowers your home's summer temperature, helps reduce polluted storm water runoff to Philly rivers and raises property values!
 Recycling	 Reduces waste in landfills and decreases litter.
 Weatherizing your home	 Reduces the amount of electricity you use in your home and lowers your utility bill!
 Getting a rain barrel	 Reduces storm water runoff and reduces your water bill because you use rainwater to water your plants and gardens or wash your car.
 Participating in clean-ups and picking up trash	 Reduces litter on the streets and improves water quality by keeping storm drains clear.
